No. 2018-04

Yields Seem to Take a Slight Dip after Last Week's Rains

Last week in Louisiana, we saw rain showers pop-up almost every day. We also saw a few more powerful storms move through in some areas helping nudge some of our rice to lodge. Voluntarily reported rice yields still look strong; however, a slight declining trend in the reported yields can be seen. Weather this week is much improved as compared to last week and once idle combines are now running from the time the dew dries until it comes back in the evening.

Table 1. Louisiana rice yield reported on August 16, 2018.

Parish	Variety	Acres	Yield			Notes
			bbl/A	bu/A	lb/A	
Jeff Davis	CL272	210	48	171	7,695

The previous table was put together by growers who voluntarily provided the information utilizing the LARICE text message group on August 16, 2018. All yields are reported wet, and grain moisture at harvest varied. If you would like to join the Louisiana Rice Text Group, simply text @larice to 81010. To unsubscribe from the group, simply text back “unsubscribe@larice” to the group.

If you would like to get the text messages by email, send an email to larice@mail.remind.com. If you would like to unsubscribe to the email messages, simply email larice@mail.remind.com with “unsubscribe” in the subject line.
